Announcement of the new school building of the International School Almere

Dear Members of the International Primary School Almere and International School Almere communities,

It is with great pleasure and excitement that we announce the next milestone in the joint venture of Het Baken and Almeerse Scholen Groep in the realization of International School Almere.

This venture was embarked on in April 2016 with the eye on delivery of the school building in 2023. At the time of completion, International Primary School Almere and International School Almere (secondary) will move to one location where primary and secondary international education is offered.

The last school year we have worked on the collaborative process with the two schools along with the Gemeente Almere to finalise and select the design of the school building that fits with our holistic educational concept.

We are pleased to announce that we will be working with van Norel bouwgroep who has won the tender bid and will be responsible for the building phase.

We look forward to working with members of the school community to fine tune the internal details of the school building as we move forward to the achievement of the goal of International School Almere, one school offering both primary and secondary international education in the Province of Flevoland.

Kind regards,

Erin Wilson & Rubin Borges

IPS Almere ISAlmere
